Dual Disc II with Auto Dry Technology: Twice As Fast

Simple - Fast - Low Cost per Disc

Simple to use

Snap two scratched discs onto the spinners, close and lock the lid. Selecting the length of time auto starts the process, the machine shuts off automatically & the discs are dry and ready for pick-up. Just a quick wipe may be required and that's it!

Two Discs at once

The Dual Disc repair machine can repair two discs at a time, more than doubling the throughput you get from the competing machines in the same category. This along with the new Policool™ 3.0 makes it the worlds fastest Desktop disc repair machine.

High Throughput

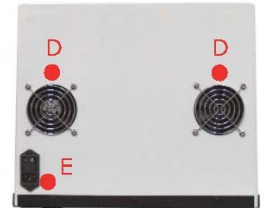

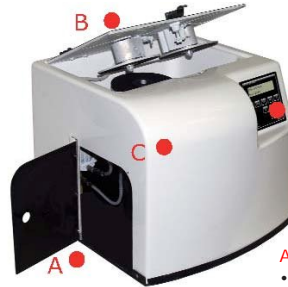

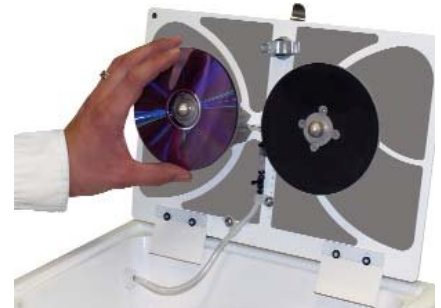

Up to 240 discs per hour repair capability! This sets this machine on top of all the other machines in its class. With the Dual Disc II Machine you can repair 48 to 240 discs per hour depending on the time level selected. Average scratches are removed in as little as 30 seconds!

Auto Dry Technology:

The Dual Disc II repair machine automatically performs a drying cycle at the end of the repair process, to remove excess liquid from the discs. The light amount of dry deposit that may still be present is very easy to remove with a quick wipe. No more discs coming out soaking wet, covered with dirty polish or with significant drips at the end of their repair cycle.

No Heads or abrasives to change, no polish compound to add:

The machine repairs up to 800 discs without needing to change anything! A new special liquid (Policool™) is continuously recirculated to ensure maximum repair strength and keeps the discs cool

- A** Access Door:
 - Policool™ Cartridge
 - Easy access to PoliCool™ pump
 - Easy access to PoliCool™ radiator
- B** Safety Lid:
 - Automatic shut-off when open
 - Easy CD/DVD snap on snap off
